

Challenger Doubles Cover Up

Materials: *Challenger Doubles Cover Up* game board; 20 tokens; 1 die with 10 sides (numbers 1-10).

Objective: To be the first person to cover up all the numbers on your side of the board.

To Play:

1. Players sit on opposite sides of the board.
2. Players decide who will go first.
3. Players take turns rolling the die. The number that is rolled is then doubled (for example, $1+1$, $2+2$, $3+3$, $4+4$, . . .), and that number is covered up on the player's side of the board. If the number is already covered up, the player's turn is over.
4. The game ends when every number on one player's side of the board is covered. That player is the winner.
