Analysis of **Sydney Riley**:

Sydney Treatment was very well detailed from the character introduction description, to her synopsis. I liked how she included the character in full detail explaining each and everyone as well as their relationship with each other, their interest, and their characteristics. The treatment was very well explained leaving no details out of each sequence with the character beginning on a camping trip within Birmingham. I do like the further detail of the groups hiking trip as they explore the mountain with more elaborated and comprehensive story thought for instance as the characters were doing in each scene, eating, there experience as well as the twist at the end as the group experience troubles with trevor on clutches, hunter bee stings, and the two girls trouble with the hives. All together the treatment is well written I don't see anything I could suggest as the The story is well organized and well written.

Analysis of **Khalil Almansoob**:

Khalil Treatment was also very detailed throughout . I like the extra detail with the characters of the bible story which was a very nice choice. I did like khalili story as it was very elaborated through each sequence. I did like how the story begins as we enter Joseph's dream of the sun and the planets as the story comes together towards the end. The brother benjamin was a nice addition as he wants to get rid of joseph for being the most favorite, this story does remind me of the story in abel and his brother as the other brothers wanted to deceive him and wanted to get rid of abel, this story remind me of the Bible story which I do love about this treatment. However I don't see how this could take place in Birmingham with Egypt as the setting, maybe with the alternation of the setting being at Birmingham but during the bc days could be a choice. But besides the setting the story and treatment was good and I didn't see any other fixes besides the setting. The story was very good, especially with the touch of a Bible story.
